5.21 Infrastructure delivery

Construction – The government is taking a series of steps to improve the cost effectiveness, productivity and timeliness of infrastructure delivery. The government will use its purchasing power to drive adoption of modern methods of construction, such as offsite manufacturing. Building on progress made to date, the Department for Transport, the Department of Health, the Department for Education, the Ministry of Justice, and the Ministry of Defence will adopt a presumption in favour of offsite construction by 2019 across suitable capital programmes, where it represents best value for money.

Infrastructure delivery – The Infrastructure and Projects Authority will publish an update to the National Infrastructure and Construction Pipeline in December 2017. This will set out a 10 year projection of public and private investment in infrastructure of around £600 billion, and demonstrate the UK's strong track record of infrastructure delivery since 2010.
