

## **Construction Leadership Council CO<sub>2</sub>nstruct Zero Performance Framework consultation**

Why are we doing this?

We know Net Zero is globally important. It matters to people regardless of age, across all aspects of society, and can help to change the way we function, live and work as a community for the better. The Prime Minister has been clear on its importance through his recent announcement to drive down our emissions.

As a sector, we contribute a considerable level of carbon emissions and therefore have a key role to play in this debate. COP26 in Glasgow provides a key staging post in this challenge, and whilst we are keen to play our role at the event, we know one event will not solve all the issues. It's therefore crucial the sector comes together through a broader drumbeat to stand up and respond to this momentous challenge:

Now is the time to deliver and have your voice heard- CO<sub>2</sub>nstruct Zero is the sector's call to arms as an industry-change programme, and proposes a set of metrics against which its impact will be measured and reported at a sector level, this will be used to share our progress with Government and understand where we need to take further action in order to reach Net Zero.

We know there are many existing initiatives in this space, within the sector, each with different reporting metrics and are grateful for all your support to date. CO<sub>2</sub>nstruct Zero's role, through the Construction Leadership Council, is to shine a light on and amplify the many initiatives in play in a co-ordinated way to corral the industry together; and provide a co-ordinated industry-wide agreed approach that Government can work with and challenge industry against.

This consultation sets out a series of proposed metrics for CO<sub>2</sub>nstruct Zero based on many measures business and projects are already using, and invites your response via [SurveyMonkey](#) by **17:00 on Friday 11 June**. This is your opportunity to influence, to state your views on how as a sector we should be measuring process and impact against the 9 priorities; and shape our future Net Zero approach to designing and building projects and buildings of all sizes. Please email [construction.enquiries@beis.gov.uk](mailto:construction.enquiries@beis.gov.uk) if you have any queries on this consultation.

CO<sub>2</sub>nstruct Zero is building a considerable momentum of support right across, and beyond the industry ranging from small-scale SMEs through to large-scale corporate companies with a global footprint, centred in UK.

We look forward to receiving your response and seeing the continued growth of interest in this programme as we collectively come together to meet the challenge laid down by the Prime Minister.

**Construction Leadership Council**
