

The Use of Face Coverings in Construction during Coronavirus (COVID-19)

The Construction Leadership Council (CLC) has published this statement on the use of face coverings on construction sites in response to coronavirus to help provide a consistent approach across the industry. It is based on Government guidance in [England](#) and other restrictions and advice may apply in [Scotland](#), [Wales](#) and [Northern Ireland](#).

Definitions

[Face coverings](#) are made from fabric or cloth and cover the mouth and nose to protect others, not the user, from infection. They are **not** PPE as they do not protect people from work-related hazards and are not made to a recognised standard.

[Surgical face masks](#) are designed and manufactured to be used in medical settings to limit the spread of infection and they are resistant to droplets of fluids and splashes. Whilst they are made to a recognised standard, they are not considered to be PPE.

Visors, which are usually worn to protect the face and eyes, are classed as PPE and protect the user, not others, against droplets carrying infection.

[Respirators](#), which are used extensively in construction activities, are classed as PPE and protect people from work-related hazards that cannot be eliminated or reduced in any other way. They should be specific to the hazard identified and provided free of charge by employers.

Current Position

The Government expects and recommends that **face coverings** are worn in crowded and enclosed spaces, such as public transport, when people mix with others they don't normally meet.

The use of **face coverings and/or PPE** is not required in response to coronavirus whilst carrying out construction activities, and the Government guidance on [Working safely during coronavirus \(COVID-19\) – Construction and other outdoor work](#) states that: *Workplaces should not encourage the precautionary use of extra PPE to protect against COVID-19 outside clinical settings or when responding to a suspected or confirmed case of COVID-19.*

CLC Position

Where workers on site are not required to wear Respiratory Protective Equipment (RPE) and their workplace (which may include welfare and changing facilities, site offices or site meeting rooms) is crowded and enclosed and they come into contact with others they do not normally meet, their employer should make face coverings available and it is expected and recommended that they should be worn.
