### About the Global BIM Network General Assembly meeting

The Global BIM Network is proud to announce its **First Annual General Assembly**, which will be held on **Thursday 2nd December 2021** with the aim to foster a more productive and collaborative global digital construction sector that delivers benefits for people and places.

At the General Assembly, Network members will **share lessons learned** from national digital transformation initiatives, consider **how governments can tackle challenges collaboratively with industry**, and **discuss the guidance, tools and evidence to inform national and international policy on better infrastructure delivery**.

By increasing the capacity and capability of the public sector as client, the Network aims to encourage the global construction sector to achieve shared goals for COVID-19 recovery, net-zero and environmental sustainability, and socioeconomic prosperity.

Attendees will hear policy makers, public procurers, infrastructure investors and industry leaders from across the globe discuss the challenges of digitally transforming the construction and infrastructure sector, and identify solutions in a candid, straightforward manner.

Sessions include:

- **Global BIM Network Roadmap Launch**
- **The Cost-Benefit of Information Management: A Global Perspective**
- **From BIM Strategy to BIM Implementation: Procurement Practices across the World**
- **Government & Industry: Working together to drive benefits for People and Places.**
